## De Putter & Co

Management Solutions

Q1 2016

### Verduyn Group is committed to safety, health, environment, quality and security

The Dutch haulier Verduyn Group with branches in Hoofddorp and the port of Antwerp, is specialized in transport of bitumen and fuels. In the past, they already worked together with De Putter & Co for the implementation of ISO 9001 and the SQAS Transport Service requirements.

In 2015, there was the publication of a considerable adaptation of the SQAS questionnaires. In this context, they cooperated again with the consultants of De Putter & Co.

The risk analyses, procedures, work instructions and checklists were substantially adapted. And several new process indicators were added to the safety management system. After an intensive SQAS Transport Service audit, they scored an exceptional 90%.

### Sales developer for Scania Finance Benelux

Scania Financial Services (SFS) provides innovative finance and insurance solutions for clients and Scania dealers in more than 50 markets.

More than 700 employees manage a fleet of more than 100.000 trucks and busses. SFS aims to be an integrated part of "Scania Solutions Sales".

In order to support the local Benelux market – from the offices in Breda – in the field of commercial development, systems & work methods, training and change management, we searched for a sales developer. Steff Vanhooff takes on this task.

### New general manager 'mainland Europe' for Suttons in Antwerp

**SUTTONS**  
DELIVERING GLOBAL LOGISTICS

Suttons Group is one of the leading specialist logistics companies in the UK, and has remained family owned

throughout its 90 year history. Suttons International – one of the operational divisions of the group – provides global specialist logistics for bulk chemicals. They own a fleet of 6000 tank containers and an extensive network of chemical logistics hubs with offices in Belgium, Singapore, China, Japan, Malaysia, Saudi Arabia, the USA and the UK.

To guarantee the continuous development of the 'mainland Europe' branch in Antwerp, we searched for a general manager with operational and commercial experience. Johan Vissers recently took on this job.

### SCC for Honeywell Analytics Benelux

The leading multinational Honeywell, specialist in the installation, maintenance and calibration of gas detection systems and solutions, cooperated already before with De Putter & Co for the implementation of a SCC safety system for their activities in Belgium. Recently, they asked De Putter & Co to facilitate the SCC certification for Honeywell Analytics Netherlands with a global certificate for the Benelux.

# Honeywell

As in Belgium, they realized a safety management system with set up and implementation of risk analyses, workplace inspections, procedures, communication structures, specific safety trainings, ...

Thanks to the professional cooperation between the consultants of De Putter & Co and the service engineers of Honeywell, an efficient safety management system has been implemented and they successfully obtained the certificate.

### New management for Jennes in Machelen

Dealer Jennes is a well-known name in Automotive. It is a growing family business with sites in Boormeerkbeek and Machelen. They distribute the brands Volkswagen, Audi and Skoda. In Machelen, they are currently building a new experience center for Volkswagen and Skoda.

Jennes worked together with De Putter & Co for the recruitment of an experienced site manager for the brands VW and Skoda in Machelen. They hired Kurt Devisscher because of his broad experience in sales and after sales management.

### Kris De Leeneer obtains ISO 22000 certificate

The logistics provider with offices in Dendermonde, recently obtained the ISO 22000 certificate : the international quality standard for companies in the food supply chain.

For Kris De Leeneer, managing director of the company, obtaining the ISO 22000 certificate was the obvious and crucial next step in the continuous development of the company. De Leeneer, established in 2001, is specialized in transport of temperature controlled goods. They recently built a new warehouse for the storage and treatment of these goods.

In order to guarantee their high quality logistics services, the company appealed to the expertise of De Putter & Co. Result of this cooperation: a dynamic and workable food safety management system with focus on risk management, basic conditions for hygiene, application of law and regulations and communication.

### Opel Commercial Vehicles department is ready for the future

Since decades Opel is one of the major players on the Belgian automotive market. They also have high

ambitions in the field of commercial vehicles and vans. Therefore, they worked together with the consultants of De Putter & Co for the continuous development of the commercial vehicles team.

Michaël Heylen was hired as business development manager. For the position of conversion manager, they recruited Frédéric Van Maelsacke. Also the fleet team needed expansion: they took on Anton Verbist as the new business sales account manager. All these professionals have the necessary background and expertise in their field.
